SIDDHARTH HM

Full Stack Software Engineer (Fresher) | React.js | Node.js | REST APIs | AI & LLM Projects

Bangalore, Karnataka, India | +91 9019983348 | siddharth.hm2@gmail.com | linkedin.com/in/siddharthhm-dev | github.com/siddharth842147

PROFESSIONAL SUMMARY

Final-year B.E. Information Science Engineering student (CGPA 8.1/10) with hands-on experience building full-stack web applications using React.js, Node.js, Express.js and REST APIs. Delivered paid freelance projects end to end, built authentication, payment and notification features, and worked on AI-powered applications during an AI/ML internship. Strong in JavaScript, Python and SQL, with solid fundamentals and a drive to learn. Seeking a Fresher Full Stack Software Engineer role.

TECHNICAL SKILLS

Front End: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design
Back End: Node.js, Express.js, RESTful API design, JWT Authentication, Bcrypt, Mongoose, Nodemailer
Databases: SQL, MySQL, MongoDB, Supabase
Languages: JavaScript, Python, Java, C++, SQL
Tools: Git, GitHub, Postman, VS Code, MySQL Workbench
AI-Assisted Development: Claude, Cursor, Codex, Amazon Q Developer (Kiro)

EXPERIENCE

Freelance Full-Stack Developer | *Project-based*

- Built and delivered multiple full-stack web applications on a paid basis, handling requirements, implementation, testing and final delivery.
- Developed REST APIs with Node.js and Express.js, designed databases, and built responsive React.js interfaces.
- Used AI-assisted development tools to speed up coding and debugging while maintaining code quality.

AI/ML Intern | *Pinnacle Labs (Remote)* | *Aug 2025 – Sep 2025*

- Built an AI-powered language translator web application using Python, Streamlit and the Deep Translator API.
- Enabled real-time translation across 100+ languages with a minimal-input, responsive interface.
- Managed source code with Git and GitHub.

PROJECTS

Digital Library Management System | *React.js, Node.js, Express.js, MongoDB* | Live Demo on Vercel

- Contributed to a full-stack college library platform covering book inventory, borrowing, returns and QR-based student identification.
- Built secure authentication with JWT and Bcrypt, and integrated Razorpay and Stripe for online fine payments.
- Developed REST APIs and reusable React components; automated email notifications with Nodemailer and generated fine receipts with PDFKit.
- Integrated the Google Books API for ISBN-based book lookup.

Kartiva – E-Commerce Website | *Next.js, TypeScript, Supabase, Tailwind CSS* | Live: kartiva.netlify.app/shop

- Built a full-stack e-commerce storefront with product listings across five categories, using Next.js, TypeScript and Supabase.
- Created a responsive UI with Tailwind CSS and shadcn/ui components.
- Used AI-assisted development tools (Kiro, Antigravity) to build and polish the application.

AI Translator Web App | *Python, Streamlit, Deep Translator API* | Live: ai-translato.netlify.app

- Built a responsive web app that translates text across 100+ languages in real time.
- Used Git and GitHub for version control and documented the project for easy setup.

EDUCATION

Jnana Vikas Institute of Technology – B.E. in Information Science Engineering | 2023 – 2027 | CGPA: 8.1/10
Coursework: Object-Oriented Programming, Database Management Systems, Data Structures

Sri Vasavi PU College – 12th Standard (PCMC), 87.5% | March 2023
