PROFESSIONAL SUMMARY

Web developer and final-year B.E. Information Science Engineering student (CGPA 8.1/10) with hands-on experience building responsive, full-stack web applications on the MERN stack. Skilled in React.js front ends, RESTful APIs with Node.js and Express.js, MongoDB and MySQL databases, JWT authentication, and payment gateway integration (Razorpay, Stripe). Delivered paid client projects end to end, from requirements to final delivery. Seeking a Web Developer / Full-Stack Developer role.

TECHNICAL SKILLS

Front End: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design, Reusable Components
Back End: Node.js, Express.js, RESTful API design, JWT Authentication, Bcrypt, Mongoose, Nodemailer, PDFKit
Databases: MongoDB, MySQL, Supabase
Integrations: Razorpay, Stripe, Google Books API
Languages: JavaScript, Python, Java, C++, SQL
Tools: Git, GitHub, Postman, VS Code, MySQL Workbench
AI-Assisted Dev: Claude, Cursor, Codex, Amazon Q Developer (Kiro)

PROJECTS

Digital Library Management System | *React.js, Node.js, Express.js, MongoDB*

- Contributed to a full-stack college library platform covering book inventory, borrowing, returns, and QR-based student identification.
- Built secure authentication with JWT and Bcrypt, and integrated Razorpay and Stripe for online fine payments.
- Automated email notifications with Nodemailer and generated downloadable fine receipts using PDFKit.
- Integrated the Google Books API for ISBN-based book lookup; developed REST APIs and reusable React components.

Kartiva – E-Commerce Website | *Next.js, TypeScript, Supabase, Tailwind CSS, shadcn/ui*

- Built a full-stack e-commerce storefront with product listings across five categories: Books, Clothing, Electronics, Home & Kitchen, and Sports.
- Developed with Next.js, TypeScript, and Supabase, with a responsive UI styled using Tailwind CSS and shadcn/ui components.
- Used AI-assisted development tools (Kiro, Antigravity) to build and polish the application.

AI Translator Web App | *Python, Streamlit, Deep Translator API*

- Built a responsive web application that translates text across 100+ languages in real time.
- Used Git and GitHub for version control and documented the project for easy setup.

EXPERIENCE

Freelance Full-Stack Developer | *Project-based*

- Developed and delivered multiple full-stack web projects on a paid basis, handling requirements gathering, implementation, testing, and final delivery.
- Built applications on the MERN stack with REST APIs, database design, and responsive React interfaces.
- Used AI-assisted development tools to speed up coding and debugging while maintaining code quality.

AI/ML Intern | *Pinnacle Labs (Remote)* | *Aug 2025 – Sep 2025*

- Developed an AI-powered language translator web application using Python, Streamlit, and the Deep Translator API.
- Enabled real-time translation across 100+ languages with a minimal-input, responsive user interface.
- Managed source code with Git and GitHub.

EDUCATION

Jnana Vikas Institute of Technology – B.E. in Information Science Engineering | 2023 – 2027
CGPA: 8.1/10 | Coursework: Object-Oriented Programming, Database Management Systems, Data Structures

Sri Vasavi PU College – 12th Standard (PCMC), 87.5% | March 2023
